## Datasheet

Compact Programmable AC/DC Power Supply

## **FEATURES**

- + Output Rating: AC 0  $\sim$  350 Vrms, DC 0  $\sim$  ±500 V
- Output Frequency up to 999.9 Hz
- DC Output (100% of Rated Power)
- Output Capacity: 500VA/1000VA
- Measurement Items: Vrms, Vavg, Vpeak, Irms, IpkH, Iavg, Ipeak, P, S, Q, PF, CF
- Voltage and Current Harmonic Analysis (THDv, THDi)
- Customized Phase Angle for Output On/Off
- Remote Sensing Capability
- OVP, OCP, OPP, OTP, AC Fail Detection and Fan Fail Alarm
- Interface: USB, LAN (std.); RS-232+GPIB (opt)
- Built-in External Control I/O and External Signal Input
- Built-in Output Relay Control and Memory Function (up to 10 sets)
- Sequence and Simulation Function (up to 10 sets)
- Support Arbitrary Waveform Function and Built-in Web Server

## Datasheet

The ASR-2000 series, an AC+DC power source aiming for system integration or desktop applications, provides both rated power output for AC output and rated power output for DC output. Ten ASR-2000 output modes are available, including 1) AC power output mode (AC-INT Mode), 2) DC power output mode (DC-INT Mode), 3) AC/DC power output mode (AC+DC-INT Mode), 4) External AC signal source mode (AC-EXT Mode), 5) External AC/DC signal source mode (AC+DC-EXT Mode), 6) External AC signal superimposition mode (AC-ADD Mode), 7) External AC/DC signal superimposition mode (AC+DC-ADD Mode), 8) External AC signal synchronization mode (AC-SYNC Mode), 9) External AC/DC signal synchronization mode (AC+DC-SYNC Mode), 10) External DC voltage control of AC output mode(AC-VCA).

The ASR-2000 series provides users with waveform output capabilities to meet the test requirements of different electronic component development, automotive electrical devices and home appliance, including 1) Sequence mode generates waveform fallings, surges, sags, changes and other abnormal power line conditions; 2) Arbitrary waveform function allows users to store/upload user-defined waveforms; and 3) Simulate mode simulates power outage, voltage rise, voltage fall, and frequency variations. When the ASR-2000 series power source outputs, it can also measure Vrms, Vavg, Vpeak, Irms, Iavg, Ipeak, IpkH, P, S, Q, PF, CF, 100th-order Voltage Harmonic and Current Harmonic. In addition, the Remote sense function ensures accurate voltage output. The Customized Phase Angle for Output On/Off function can set the starting angle and ending angle of the voltage output according to the test requirements. V-Limit, Ipeak-Limit, F-Limit, OVP, OCP, OPP function settings can protect the DUT during the measurement process. In addition to OTP, OCP, and OPP protection, the ASR-2000 series also incorporates the Fan fail alarm function and AC fail alarm function.

The front panel of the ASR-2050/2100 provides a universal socket or a European socket, which allows users to plug and use so as to save wiring time. The ASR-2050R/2100R is 3U height and 1/2 Rack width design, which is compatible with ATS assembly. The ASR-2000 series supports I/O interface and is equipped with USB, LAN, External I/O and optional RS-232C and GPIB.

### **OPERATING AREA FOR ASR-2000 SERIES**

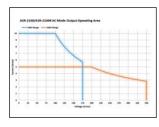

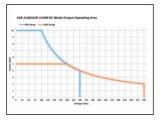

AC Output for ASR-2050/ASR-2050R

ASR-2050/ASR-2050R

The ASR-2000 series is an AC+DC power source that provides rated power output not only at the AC output, but also at the DC output. The operation areas are shown in diagrams.

AC Output for ASR-2100/ASR-2100R

DC Output for ASR-2100/ASR-2100R

Model Name	Power Rating	Max. Output Current	Max. Output Voltage
ASR-2050	500 VA	5 / 2.5 A	350 Vrms / 500 Vdc
ASR-2100	1000 VA	10 / 5 A	350 Vrms / 500 Vdc
ASR-2050R	500 VA	5 / 2.5 A	350 Vrms / 500 Vdc
ASR-2100R	1000 VA	10 / 5 A	350 Vrms / 500 Vdc

instantaneous calculation reading.

### SIMULATE MODE

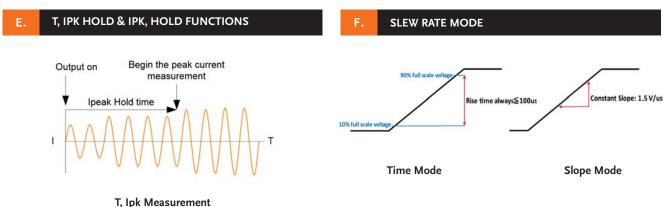

Power Outage

Voltage Rise

Voltage Fall

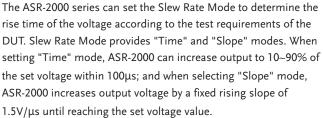

Simulate Mode can quickly simulate different transient waveforms, such as power outage, voltage rise, voltage fall, etc.,

for engineers to evaluate the impact of transient phenomena on the DUT. Ex: Capacitance durability test.

T, Ipk Hold is used to set the delay time after the output (1ms ~ 60,000ms) to capture the Ipeak value and keep the maximum value. The update only functions when the measurement value is greater than the original value. The T, Ipk Hold delay time setting can be used to measure surge current at the power on process of the DUT. rise time of the DUT. Slew Rat setting "Time" the set voltage ASR-2000 incre 1.5V/µs until r

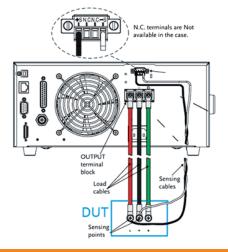

Ipk Hold can be used to measure the transient surge current of the DUT at power on without using an oscilloscope and a current probe.

In addition, if users decide to self-define the rise time of the output voltage, users can flexibly set the rise time of the ASR-2000 series voltage by editing the Sequence mode.

### G. REMOTE SENSE FUNCTION

Amplicon.com

For high current output applications, the voltage drop caused by large current passing through the load cables will affect the measurement results. The ASR-2000 series provides the remote sense function that can sense the voltage drop of the DUT to the ASR-2000 series and the DUT will be compensated by the ASR-2000 series. The maximum voltage that the remote sense function can compensate is 5% of the output voltage.

### OPTIONAL ACCESSORIES **RDERING INFORMATION** Opt01 : RS-232+GPIB Communication Functions (Factory installed) ASR-2050 500VA Programmable AC/DC Power Source Opt02 : European Output Outlet only for ASR-2000 (Factory installed) ASR-2100 1000VA Programmable AC/DC Power Source GET-003 Extended Universal Power Socket(ASR-2000R only) ASR-2050R 500VA Programmable AC/DC Power Source for 3U 1/2 Rack Mount GET-004 Extended European Power Socket(ASR-2000R only) GRA-439-E Rack Mount Kit (EIA) ASR-001 Air inlet filter ASR-2100R 1000VA Programmable AC/DC Power Source for 3U 1/2 Rack Mount GRA-439-J Rack Mount Kit (JIS) GTL-232 RS-232C Cable, approx. 2M CD ROM (User Manual, Programming manual), Safety Guide, Power Cord, GTL-258 Mains Terminal Cover Set, Remote Sense Terminal Cover Set, GTL-123 Test Lead, NLO GTL-246 USB Cable USB Driver

ASR-001 Air inlet filter ASR-002 External three phase control unit GPIB Cable, approx. 2M, including 25 pins Micro-D connector

Note : GET-003/GET-004 are not C€ approved.

### ASR-002

\* Functions of ASR-Series are limited when ASR-Series applied to ASR-002 1. No DC Output(100% of Rated Power)

- 2. Measurement Items:only current(A).power(W)and PF for each phase
- Ne voltage and current Harmonic Analysis (THDv, THDi)
   No knot sensing Capability
   No Arbitrary Waveform Function

- 5. No Foregues and Simulation Function (up to 10 sets) 7. Interface: only support USB 8. Not supported Built-in External Control I/O 9. No memory Function(up to 10 sets) 10. No LAN port(Built-in Web Server)
