

Senses 5150S

Features

Senses silent fanless industrial panel PCs utilise the Intel 852GM + ICH4 chipset and provide TFT LCD sizes of 10.4", 12.1" and 15.0". The low power Intel Mobile processor and fanless robust chassis with IP65 rated front panel make these models ideal as fast and stable human machine interfaces (HMI) for SCADA applications.

Manufactured from selected high quality industrial components, this model comes with a 15.0" touchscreen display, an anti-vibration mounted storage drive and a mini-PCI slot for WLAN applications.

Our production processes are controlled under ISO 9001:2000 and every system undergoes a full diagnostic burn-in prior to shipment.

Systems can be tailored to meet your exact requirements. Each Industrial Panel PC comes with a 2 year warranty.
