# Cisco Industrial Wireless 3700 Series Access Points

Cisco IW3700 Series Access Points with industrial environmental qualifications and industry-leading 802.11ac Wi-Fi performance:

- Qualified for extreme industrial and outdoor environments
- Ideal for rail, transportation, mining, oil and gas, manufacturing, and other outdoor applications
- Extended operational temperature range
- Compact but rugged IP67-rated housing to protect against liquid and dust ingress
- Vibration-rated M12 Ethernet and DC power connectors
- Versatile RF coverage with external type N antenna connectors

Dual-band 2.4-GHz and 5-GHz radios with 802.11ac Wave 1 support on the 5-GHz radio Operational flexibility:

- Lightweight mode for controller-based deployment
- Autonomous and workgroup bridge (WGB) support

Troubleshooting forensics for faster interference resolution and proactive action:

- Classifies more than 20 different types of interference, including non-Wi-Fi interference, within 5 to 30 seconds.
- Automatic remedial action and less manual intervention.
- Historic interference information for back-in-time analysis and faster problem solving.
- 24-hour monitoring with remote access reduces travel and speeds resolution.
- Cisco Spectrum Expert Connect mode provides real-time, raw spectrum data to help with difficult-todiagnose interference problems.
- Air quality index in Cisco CleanAir technology provides a snapshot of network performance and the impact of interference.

#### Robust Security and Policy Enforcement

- Industry's first access point with non-Wi-Fi detection for off-channel rogues.
- Supports rogue access point detection and detection of denial-of-service attacks.
- Management frame protection detects malicious users and alerts network administrators.
- Enables policies to prohibit devices that interfere with the Wi-Fi network or jeopardize network security.

The Cisco<sup>®</sup> Industrial Wireless 3700 (IW3700) Series Access Points deliver industry-leading performance and a high-density experience for industrial and outdoor use. The IW3700 offers industrial-grade environmental qualifications while providing higher speeds for video and other bandwidth-intensive applications and extending support to a new generation of Wi-Fi clients, such as smartphones, tablets, and high-performance laptops that have integrated 802.11ac support.

In its first implementation, 802.11ac Wave 1 provides a rate of up to 1.3 Gbps, roughly triple the rates offered by today's high-end 802.11n access points. This provides the necessary foundation for industrial, enterprise, and service provider networks to stay ahead of the performance, and bandwidth expectations and needs of their wireless users.

Due to its convenience, wireless access is increasingly the preferred form of network connectivity for industrial users. Along with this shift, there is an expectation that wireless should not slow down users' day-to-day work but should enable a highperformance experience while allowing users to move freely around the corporate environment.

The IW3700 offers a scalable and secure mesh architecture for high-performance Wi-Fi services.

#### **High-Density Experience**

Building on Cisco's heritage of RF excellence, the Cisco IW3700 Series Access Points use a purpose-built innovative chipset with the best-in-class RF architecture. This chipset provides a high-density experience for industrial and enterprise networks designed for mission-critical, high-performance applications. The IW3700 is a series of flagship access points, delivering environmentally qualified key requirements of industrial applications, industry-leading performance for highly secure and reliable wireless connections and a robust mobility experience that includes:

- 802.11ac with 4 x 4 multiple-input multiple-output (MIMO) technology with three spatial streams that offer sustained 1.3-Gbps rates over a greater range for more capacity and reliability than competing access points.
- Optimized access point roaming ensures clients are associated with the best access points offering the best data rate available.
- Cisco ClientLink 3.0 technology to improve downlink performance to all mobile devices, including one, two, and three spatial stream devices on 802.11ac while improving battery life on mobile devices, such as smartphones and tablets.
- Cisco CleanAir<sup>®</sup> technology enhanced with 80-MHz channel support provides proactive, high-speed spectrum intelligence across 20-, 40-, and 80-MHz wide channels to combat performance problems due to wireless interference.
- MIMO equalization optimizes uplink performance and reliability by reducing the impact of signal fade.

The new Cisco IW3700 Series Access Points sustain reliable connections at higher speeds farther from the access points than competing solutions, resulting in up to three times more availability of 1.3-Gbps rates and optimizing the performance of more mobile devices. The IW3700 carries forward the industry-leading features of the Cisco Aironet<sup>®</sup> 3700 Series.

All of these features help ensure the best possible end-user experience on the wireless network. Cisco also offers the industry's broadest selection of 802.11n and 802.11ac antennas, delivering optimal coverage for a variety of deployment scenarios.

#### Scalability

The Cisco IW3700 Series Access Points are a component of the Cisco Unified Wireless Network, which can scale to as many as 18,000 access points with full Layer 3 mobility across central or remote locations on the enterprise campus, in branch offices, and at remote sites. The Cisco Unified Wireless Network is the industry's most flexible, resilient, and scalable architecture, delivering highly secure access to mobility services and applications and offering the lowest TCO and investment protection with the ability to be integrated smoothly with the existing wired network.

#### **Product Specifications**

Table 1 lists the specifications for the Cisco IW3700 Series Access Points.

#### Table 1. Product Specifications

Item	Specification
Part numbers	Cisco IW3700 Series Access Points with Regulatory Domain Code
	IW3702-2E-x-K9: 2 antenna connectors on top and bottom for directly attached external antennas (4 antenna connectors total)
	• IW3702-4E-x-K9: 4 antenna connectors on the same side for other external antennas
	Cisco IW3700 Series Universal Access Points
	<ul> <li>IW3702-2E-UXK9: 2 antenna connectors on top and bottom for directly attached external antennas (4 antenna connectors total)</li> </ul>
	<ul> <li>IW3702-4E-UXK9: 4 antenna connectors on the same side for other external antennas</li> </ul>
	Regulatory Domains: (x=regulatory domains)
	<ul> <li>Domain codes available for the IW3700 Series are x=A, B, D, E, R and Z; additional regulatory domains are supported by the universal access points.</li> </ul>
	Customers are responsible for verifying approval for use in their individual countries.
	Mounting Accessories
	<ul> <li>AIR-ACCPMK3700=: Pole mounting kit, vertical pole only (2 to 3 inches in diameter), does not require band installation tool</li> </ul>
	<ul> <li>AIR-ACCPMK3700-2=: Pole mounting kit, for poles with 2 to 16 inches in diameter</li> </ul>
	<ul> <li>AIR-ACCDMK3700=: DIN rail mounting kit</li> </ul>
	Powering Accessories
	AIR-PWRINJ1500-2=: PoE+ power injector, for indoor environments
	• AIR-PWRINJ-60RGD1=: PoE+ power injector, for outdoor environments, with North American plug
	AIR-PWRINJ-60RGD2=: PoE+ power injector, for outdoor environments, international version without AC plug
	AIR-PWRINJ-60-PMK=: Pole mount kit for AIR-PWRINJ-60RGD1= and AIR-PWRINJ-60RGD2=
	AIR-PWRADPT3700NA=: AC to DC power adapter, with North American plug
	<ul> <li>AIR-PWRADPT3700IN=: AC to DC power adapter, international version without AC plug</li> <li>Power and Network Cables</li> </ul>
	CAB-PWR-M12-10=: M12 DC power cable, 4 pins, A-Code, 10 ft
	CAB-ETHRJ45-M12-10=: M12 to RJ-45 Ethernet cable, 8 pins, X-Code, 10 ft
	Cisco Smart Net Total Care <sup>™</sup> Service for the Cisco IW3700 Series Access Points
	CON-SNT-IW37022E and CON-SNTP-IW37022E: Smart Net Total Caret for IW3702-2E
	CON-SNT-IW37024E and CON-SNTP-IW37024E: Smart Net Total Care for IW3702-4E
	Cisco Wireless LAN Services
	<ul> <li>AS-WLAN-CNSLT: Cisco Wireless LAN Network Planning and Design Service</li> </ul>
	AS-WLAN-CNSLT: Cisco Wireless LAN 802.11n Migration Service
	AS-WLAN-CNSLT: Cisco Wireless LAN Performance and Security Assessment Service
Software	Cisco Unified Wireless Network Software Release with AireOS Wireless Controllers:
Continuito	8.0.120.0 or later for the Cisco IW3700 Series Access Point
	Cisco IOS Software Release
	<ul> <li>15.3(3)JA5 or later for the Cisco IW3700 Series Access Point</li> </ul>
Supported wireless LAN controllers	<ul> <li>Cisco 2500 Series Wireless Controllers, Cisco Wireless Controller Module for ISR G2, Cisco Wireless Services Module 2 (WiSM2) for Catalyst<sup>®</sup> 6500 Series Switches, Cisco 5500 Series Wireless Controllers, Cisco Flex<sup>®</sup> 7500 Series Wireless Controllers, Cisco 8500 Series Wireless Controllers, Cisco Virtual Wireless Controller</li> </ul>
902 1100 Wave 1	
802.11ac Wave 1 capabilities	<ul> <li>4 x 4 MIMO with 3 spatial streams</li> <li>Maximal ratio combining (MPC)</li> </ul>
	Maximal-ratio combining (MRC)
	<ul> <li>802.11ac beamforming</li> <li>20-, 40-, and 80-MHz channels</li> </ul>
	<ul> <li>PHY data rates up to 1.3 Gbps (80 MHz with 5 GHz)</li> </ul>
	<ul> <li>Packet aggregation: A-MPDU (Tx/Rx), A-MSDU (Tx/Rx)</li> </ul>
	802.11 dynamic frequency selection (DFS)
	Cyclic shift diversity (CSD) support

#### Five Year Hardware Warranty

The Cisco IW3700 Series Access Points come with a 5-year limited warranty. The warranty includes 10-day advance hardware replacement and ensures that software media are defect-free for 90 days.
